Management's commentary

The interim report is significantly affected by the implementation of IFRS16 (recognition of leases), which cause many line items of 2019/20 to be not directly comparable to 2018/19. Please see note 1 for further information.

Revenue for YTD 2019/20 was DKK 2.197m, which was in line with YTD 2018/19. Gross margin was 20.5%. Gross margin before IFRS16 effect was 16.0% compared to 15.7% in YTD 2018/19. Q2 revenue was DKK 1.116m compared to DKK 1.158m in Q2 2018/19.

EBITDA before special items for YTD 2019/20 was DKK 281m. EBITDA before special items and IFRS16 effect was DKK 171m compared to DKK 169m YTD 2018/19. Q2 EBITDA before special items and IFRS16 effect was DKK 93m compared to DKK 92m in Q2 2018/19. The YTD period was characterised by strong performance in Soil, Waste and Water, where EBITDA grew by DKK 20m. However, the improvement was offset by weaker performance in Transportation where EBITDA fell by DKK 17m. Soil, Waste and water mainly saw strong performance in its Danish business including the Water business. The weaker performance in Transportation mainly relates to Q1 and relates to the Swedish business, which was negatively affected by an unfavourable competitive environment in the Southern region, general slowdown in the construction industry and challenges in aligning capacity to activity fluctuations for own trucks. Raw Materials decreased slightly compared to last year.

Special items for YTD 2019/20 amounted to DKK 11m in line with YTD 2018/19. The expenses mainly relate to the strategic review of the Soil, Waste and Water segment and restructuring cost related to Transportation.

Net financial expenses for YTD 2019/20 amounted to DKK 72m. Net financial expenses before IFRS 16 effect was DKK 53m compared to DKK 54m in YTD 2018/19. The majority of the expenses relate to bond interest expenses.

Cash flow from operating activities before net financials and tax amounted to DKK 293m YTD 2019/20. Cash flow from operating activities before net financials and tax before IFRS16 effect amounted to DKK 192m YTD 2019/20 - an increase of DKK 42m compared to YTD 2018/19. Net cash flows amounted to DKK 72m YTD 2019/20. Investments YTD 2019/20 included the completion of the construction of a distribution terminal in Karlstad, Sweden.

The net interest bearing debt to EBITDA ratio before IFRS16 effect decreased to 4.9 from 5.2 by end of 2018/19 and 5.1 by end of Q2 2018/19. The decrease is mainly driven by cash flow from operating activities.

The Group does not face particular significant risks besides risks generally impacting the business areas. However, the balance sheet is affected by accounting estimates, primarily on measurement of intangible assets and property, plant and equipment, provisions and deferred income regarding treated soil.

The Group performance is – among other things – affected by the general macroeconomic conditions including the level and timing of infrastructure projects and construction activity. For 2019/20, the Group continue to expect revenue to be between DKK 4.200m - 4.600m and EBITDA to be between DKK 300m - 320m (excluding effects from IFRS 16). The expectations are based on exchange rates similar to those realized in 2018/19.

As further described in note 1 to the Group's Annual Report for 2018/19, the implementation of IFRS 16 in the Group has significant impact on the Group's financial reporting for 2019/20 and onwards. With a view to the description in note 1 to the Group's Annual Report for 2018/19, the Group expects IFRS 16 to increase EBITDA for 2019/20 by DKK 210-250m (previously DKK 160-200m). The adjustment is due to entering additional lease agreements and the effects of IFRS16-transition.

On 20 May 2019, the Group announced its decision to initiate a strategic review in relation to its subsidiary RGS Nordic A/S (the Soil, Waste and Water segment), which may or may not lead to a divestment of RGS Nordic. As the strategic review is still in process, there can be no assurance of the outcome of the process, including if a divestment will occur, nor the timing thereof.

Events after the balance sheet date

No events have occurred after the balance sheet date that materially affect the interim financial report.

Notes

1 Accounting policies

DSV Miljø Group A/S is a public limited company with its registered office in Denmark.

The interim financial report has been prepared in accordance with IAS 34 on interim reporting as adopted by the European Union and additional Danish disclosure requirements for interim financial reports of listed companies.

Certain reclassifications have been made to the comparative 2018-19 figures to align presentation. The reclassifications have not had any effect on the income statement, equity or balance sheet total.

Except for the changes below, the consolidated interim financial statements have been prepared using the same accounting policies as set out in note 1 of the 2018/19 Annual Report which contains a full description of the accounting policies for the Group and the parent company.

Changes in accounting policies

Effective 1 May 2019, DSV Miljø Group has adopted IFRS16 leases using the modified retrospective method.

IFRS 16 Leases

Upon adoption of IFRS 16, the Group applied a single recognition and measurement approach for all leases that it is the lessee. The Group recognised lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets. In accordance with the modified retrospective approach the comparative information in this interim financial report has not been restated. Comparative figures are presented according to IAS 17. The right-of-use assets are depreciated over the lease period, i.e. up to 15 years.

2 Accounting estimates and judgements

When preparing the financial statements, Management makes assumptions and estimates affecting the recognised assets and liabilities, including information on contingent liabilities. Such estimates comprise assessments based on the latest information available at the time of the financial reporting.

The significant accounting judgements, estimates and assumptions applied in these consolidated interim financial statements are the same as disclosed in note 2 of the 2018/19 Annual Report which contains a full description of significant accounting judgements, estimates and assumptions.

Total minimum payments	2	484	742
Payment guarantees have been provided in respect of restoration of gravel pits and third party guarantees	293	228	216

For 2019-20, IFRS16 incur that most agreements previously disclosed above are now recognised in the Group's balance sheet.

Management's statement

The Board of Directors and Executive Management have today considered and approved the interim financial report of DSV Miljø Group A/S for the second quarter of 2019/20 ended 31 October 2019 and the period 1 May - 31 October 2019.

The financial report has been prepared in accordance with IAS 34 on interim reporting as adopted by the European Union and additional Danish disclosure requirements for interim financial reports of listed companies. The interim financial report has neither been audited nor reviewed by the Company's auditor.

In our opinion the interim financial report give a true and fair view of the Group's assets, liabilities and financial position at 31 October 2019 and of the results of the Group's operations and consolidated cash flows for the financial period 1 May - 31 October 2019.

Further, in our opinion we find that the Management's commentary describes the significant risks and uncertainties faced by the Group and gives a fair review of the development and performance of the Group's activities and of the Group's results for the period and the financial position taken as a whole.

Copenhagen, 17 December 2019
